

From the Sun...

This workshop will provide lesson plans, multimedia resources, and hand-on activities that participants will actually take part in during the workshop.

NASA materials will be provided as well as “make and take” resources so that you can “hit the ground running.”

UV radiation, making the Electromagnetic field around the earth understandable, Impact craters, moon’s phases, cake batter lava are just a few of the activities that will be presented. Join us for in this action packed day that will end with a Lunar Sample Certification session!

To Pluto...

And Beyond...

When:
Oct. 30, 2010, 9 – 4

Where:
NASA Educator
Resource Center
Museum of Aviation,
Warner Robins

Cost:
FREE - Teachers will receive a \$50 stipend for attending.

For Teachers in Grades K – 8

Presenter: Nancy Sills
NASA Solar System Educators
